• Statement

My practice merges the Japanese philosophy of minimalism with British and European art influences. By washing paint and revealing the colour and texture of exposed canvas in shapes of figures, the paintings invite viewers to reflect on themselves through the undefined surface. The interplay between paint and the raw canvas colour evokes a sense of presence within turbulence. The works explore the body, emotions, and identity in a contemporary society where individuality is more emphasised than ever.

• Award

- 2026 Jackson's Art Prize Longlist
